## Standard of Practice: Ozone Therapy

### Standard of Practice

When performing ozone therapy, naturopathic doctors must do so in a safe, competent and ethical manner.

### Introduction

A complete list of restricted activities is found in the *Government Organization Act S.7.1*. Restricted activities authorized for naturopathic doctors are listed in the *Naturopaths Profession Regulation*. Naturopathic doctors are granted the restricted activities of:

- administering a needle or cannula below the dermis for the purpose of providing intravenous ozone;
- to insert or remove instruments, devices or fingers beyond the labia majora for the purposes of vaginal ozone therapy; and
- to insert or remove instruments, devices or fingers beyond the anal verge for the purpose of performing rectal ozone therapy.

This standard is intended to outline how naturopathic doctors can provide safe, competent and ethical care, when performing ozone therapies for a patient.

### Definitions

**Competence:** the combined knowledge, skills, attitudes and judgement required to provide professional services, defined in the *Health Professions Act*.

**Ozone therapy:** the application of ozone for therapeutic purposes, including intravenous, intradermal, subcutaneous, vaginal, rectal and topical applications.

**Restricted activities:** indicated activities performed as part of providing a health service that require specific competencies and skills to be carried out safely. Restricted activities are not linked to any particular health profession and a number of regulated health professionals may perform a particular restricted activity. A complete list of restricted activities is found in the *Government Organization Act S.7.1*. Restricted activities authorized for naturopathic doctors are listed in the *Naturopaths Profession Regulation*.

**Standard of Practice:** an authoritative statement that describes a minimum required behaviour of every naturopathic doctor and is used to evaluate individual conduct. Naturopathic doctors should always strive to practice above the minimum standards. Performance below the minimum standard may result in disciplinary action.

### Naturopathic doctors demonstrate this standard of practice by:

1. only performing ozone therapy with authorization by the Registrar and in accordance with any restrictions or provisions required by the Registrar;
2. ensuring that all required qualifications to perform ozone therapy are current, in accordance with the **CNDA Continuing Competence Program Rules**;
3. having skills and knowledge of:

- a) theory and principles of ozone therapy,
  - b) assessment and diagnosis,
  - c) how to prepare ozone therapy solutions safely and competently,
  - d) treatment techniques, and
  - e) indications and contraindications;
4. ensuring proper documentation of ozone therapy treatments in the patient medical record in accordance with the **CNDA Standard of Practice: Records Keeping** and must include:
    - a) concentration of ozone administered,
    - b) administration site(s), and
    - c) state of patient upon conclusion of treatment;
  5. ensuring proper labelling of the IV bag to include:
    - a. concentration and volume of each substance added to the bag;
    - b. date and time the bag was drawn up;
    - c. name of person who drew up the bag;
    - d. patient's name;
    - e. carrier solution;
  6. ensuring written protocols are in place and followed when collaborating with another regulated health professional within a clinic/health care setting as per the **CNDA Standard of Practice: Collaboration in Patient Care** and **CNDA Standard of Practice: General**;
  7. complying with the **CNDA Standard of Practice: Intravenous Therapy** when administering intravenous ozone;
  8. ensuring the ozone generating machine is maintained and its maintenance documented in accordance with the **CNDA Standard of Practice: Records Keeping** and the **CNDA Guideline: Medical Devices and Technologies**;
  9. having knowledge of and performing ozone therapy in accordance with the following CNDA standards:
    - a) **CNDA Standard of Practice: General**,
    - b) **CNDA Standard of Practice: Consent**,
    - c) **CNDA Standard of Practice: Collaboration in Patient Care**,
    - d) **CNDA Standard of Practice: Duty to Report**
    - e) **CNDA Standard of Practice: Clean Needle Technique**, if applicable,
    - f) **CNDA Standard of Practice: Emergency Readiness**, and
    - g) **CNDA Standard of Practice: Infectious Disease Prevention and Control**
    - h) **CNDA Standard of Practice: Naturopathic Injection Therapies**;
  10. having knowledge of and applying the principles of the **CNDA Guideline: Collaboration in Patient Care**;
  11. complying with supervision requirements as set out in *Naturopaths Profession Regulation*, when supervising another naturopathic doctor perform this restricted activity.

### Expected Outcomes

Patients are satisfied that:

- naturopathic doctors perform ozone therapy safely, competently and ethically.
